OXFORD CLASSIC WAINSCOT  
BEADBOARD & PANEL SYSTEMS

## EXTERIOR GRADE S4S BOARDS

Our exterior grade S4S boards are made from finger jointed Paulownia, an exceptionally good sustainable product that resists moisture, insects and decay. Each board is primed with 2 coats of exterior grade primer, buffed in between coats. As a hardwood, it is very easy to machine and work with.

All S4S Boards are 16' Lengths

## CUSTOM PANELED WAINSCOTING

### *Frequently Asked Questions*

- 1 How long does it take to receive my wainscoting?**  
Your order from processing will take 3-5 weeks.
- 2 What is the longest piece of wainscoting you will ship me?**  
Your wainscoting will be built and assembled to your measurements, up to 8 feet long. For walls over 8 feet, the wainscoting will be shipped in segments and joined together by you, with blind screws from the back. But don't worry, you will never see the joints.
- 3 What if a piece of wainscoting comes in the wrong length?**  
You must take the measurements very carefully! Double check the measurements before sending the order. We double check ours before sending them out.
- 4 Do you offer other sizes?**  
No, we have found that 36" is a classic height for wainscoting, if you want it taller, try lifting it off the floor using a taller baseboard moulding!
- 5 Is it hard to install this wainscoting?**  
No, any professional can install this, and certainly it is a great project for the weekend DIY professional.
- 6 What do we do about outlets in the wall?**  
They can be cut into the wainscoting providing they fall in a panel. If they don't, you will need to have a licensed electrician move the outlets. We never want to alter a panel size to accommodate an outlet!
- 7 What do we do about air vents in the wall?**  
They can be cut into the wainscoting providing they fall in a panel. If they don't, you will need to have a licensed H.V.A.C. contractor move the vents. Most times it is moved down toward the floor and a register is built into the base trim.
- 8 Who do we send the order form to?**  
Contact your local A&B Wood Design dealer and fax it to them.

# CUSTOM paneled WAINSCOTING

## How to Order

OXFORD CLASSIC WAINSCOT  
BEADBOARD & PANEL SYSTEMS

1. Draw basic room layout (see Figure 1)
2. Label each wall (ie; A, B, C)
3. Document each wall dimension
4. Draw your window walls (Figure 2). Include dimensions as shown
5. For stairwells, draw the wainscoting, (Figure 3) include the dimensions as shown  
**\*these dimensions are standard**
6. Give us the angle measurements as shown (Figure 4)
  - ◆ Draw a "Plumb Line" up 24"
  - ◆ At the 24" mark, draw a "Level Line" back to the stringer
  - ◆ Take your time, these are critical measurements

WAINSCOT SYSTEMS

# Moulding Combinations

Mouldings are frequently combined to provide a larger composite profile, rendering a more pronounced look. Backbands provide additional depth to Casings, Base mouldings can be used to further enhance Chair Rails, and when inverted, can extend the look of a Crown detail. While the possible combinations are only limited by the imagination, we offer a few to illustrate the potential.

# Historic Mouldings

## About the Historic Moulding Section...

The following mouldings represent a broad spectrum of architectural periods and styles. They were collected from books, magazines, and historic sites around the country. In designing this chapter, it was impossible to include all mouldings from a certain period. Therefore, the profiles presented here reflect A & B's choices for the best representation of a particular period or style.

The mouldings in this section are grouped according to the following architectural styles:

Federal  
Art Deco  
Victorian

Colonial  
Wren & Georgian

Greek Revival  
Tudor

While historically appropriate, all mouldings presented here may not be absolutely authentic. In some instances, the profiles have had to be modified in order to reduce prohibitive material costs and/or to enable them to be manufactured using today's machinery. These modifications are minimal, however, and do not detract from the true historic flavor of the mouldings.
