

A & B Wood Design – COMBINATION MOULDINGS

All profiles shown at approximately 1/3 scale • Other species available by special order

Mouldings are frequently combined to provide a larger composite profile, rendering a more pronounced look. Backbands provide additional depth to Casings, Base mouldings can be used to further enhance Chair Rails, and when inverted, can extend the look of a Crown detail.

While the possible combinations are only limited by the imagination, we offer a few to illustrate the potential.
